

Patek Philippe

ANNUAL CALENDAR CHRONOGRAPH REF. 5905P

CLASSIC

TECHNICAL

Among the most coveted Patek Philippe complicated watches, Two functions stand out. They are the annual calendar, which needs correcting just once a year, and the chronograph. So as to satisfy its public, the brand has again united these two complications, in the platinum Ref. 5905P. In 1996, Patek Philippe was awarded a patent for its annual calendar. Ten years later it unveiled its first self-winding chronograph movement, developed and manufactured entirely in-house. It was combined with an annual calendar, thus perpetuating Patek Philippe's heritage in calendar chronographs. A tradition that lives on in this new timepiece.
