## DIAMOND PUNK

### DESIGN

Designers and gem-setters worked for a combined 1,440 hours to produce this stunning haute joaillerie watch, which is inspired by the highly-charged aesthetic of the punk era. The cuff bracelet is constructed from 56 pyramid spikes of different sizes, with 7,848 brilliants covering the all-diamond version; 5,326 brilliants for the model also with onyx. The dial for both versions is concealed beneath a sliding cover and studded with a further 300 brilliants. All the diamonds are arranged in a snow setting so that each One can sit as closely as possible to its neighbour.
