AVENGER HURRICANE

TECHNICAL

Adventure is never far away with the Avenger Hurricane on the wrist. This ultra-powerful, super-sized chronograph stands out with its 50-mm XXL diameter, an extreme size that still procures an extremely comfortable fit. Indeed, the Avenger Hurricane is exceptionally lightweight thanks to the innovative use of Breitlight®, a high-tech material that is 3.3 times lighter than titanium and 5.8 times lighter than steel, but significantly harder for resistance and robustness in all circumstances. Exactly like the COSC-certified Manufacture Breitling Calibre B12 inside. Precise, functional and efficient from every angle, Breitling has built this instrument for professionals to meet the needs of aviation's high-flyers.
