OCTO TOURBILLON SAPPHIRE

DESIGN

Here is a watch that has nothing to

hide, its inner workings revealed through the transparency of sapphire crystal.

Intensely modern in design, the Octo Tourbillon Sapphire sits inside a

beautifully proportioned, 44-mm titanium case with a black diamond-like carbon

coating around a sapphire middle. The One departure from the signature and hugely

successful Octo design is the softened contours of the octagonal bezel.

Movement-wise, the eye is immediately drawn to the flying tourbillon, whose traditional aesthetic contrasts with the contemporary architecture of the eleven black DLC-coated bridges. They are finished with an innovative green lume made from ITR2 and SLN, lending a futuristic feel to this Octo which includes a useful power-reserve indication on the reverse side.
