

Piaget

EXTREMELY LADY

WOMEN'S

Since the 1960s, Piaget has excelled in the art of fashioning gold into beautiful bracelets whose sumptuous textures are matched only by their ingenious fastenings. Now, the brand has reprised three legacy designs from its portfolio of goldwork, and transposed them to gold bracelets that emulate fur, frost or wood for the Extremely Lady collection. These six contemporary watches complement the white or pink gold of their diamond-studded cases with oval dials in mother-of-pearl, lapis lazuli, heart of ruby, opal or turquoise.
