## NAVITIMER SUPER 8

### TECHNICAL

The Reference 637 stopwatch is one of the watches to come out of the HUIT Aviation Department that Willy *Breitling* set up in 1938, specifically to produce cockpit instruments and robust, legible pilot's watches. Shortly before the Second World War, the Royal Air Force ordered a large quantity of the Reference 637 which bomber pilots wore strapped around their thigh. The new Navitimer Super 8, which features a prominent crown now placed on the right side of the case and a distinctive bidirectional rotating bezel for an overall diameter of 50mm – is largely inspired by this historic model. Inside ticks the COSC-certified B20 calibre which is based on Tudor's MT 5612 calibre.
