## CLASSIC FUSION ORLINSKI

WOMEN'S

DESIGN

Sculptor Richard Orlinski is a longstanding friend of Hublot; the two partners have already collaborated on bold, architectural watches deploying multiple facets and angles. For this Classic Fusion, the artist has expressed his signature style in the more restrained volumes of a case measuring 40mm in diameter and 11.10mm high. The result is a more feminine watch displaying softer angles and with mirror effects on the also faceted dial. The case is crafted from King Gold (100 pieces) or titanium (200 pieces). There are also versions in the same King Gold or titanium that are fully or partially set with diamonds. The movement is the HB1100 automatic calibre that measures hours, minutes and seconds.
