

Bulgari

## OCTO FINISSIMO CHRONOGRAPH GMT AUTOMATIC

### TECHNICAL

*Bulgari* cements its reputation for ultra-thin watches with the thinnest ever automatic chronograph, adding a fifth world record to its tally in the process. The in-house integrated movement combines a chronograph function with a second time zone in a 3.30mm height. This mechanical exploit resides within the ultra-contemporary forms of the Octo case in sandblasted titanium. Both the dial and the bracelet are in the same ultra-light material. Comfort on the wrist is assured, as is the legibility of the crisp dial. A subdial at 3 o'clock shows home time over 24 hours, thus differentiating day and night. The chronograph minute counter is at 6 o'clock, with small seconds at 9 o'clock. All within a 42mm diameter and a case thickness of just 6.90mm.
