VIRTUOSO IX

TECHNICAL

CLASSIC

This is many watches in one. Firstly, by way of the Amadeo convertible case which, without any tools, transforms from wristwatch to pocket watch to desk Clock. Also, because this is a reversible watch, having two faces. On the front, behind a deceptively classic appearance, this Virtuoso IX presents an original indication of hours, minutes and a second time zone via a single central hand for the minutes, joined by a local hour hand at 2 o'clock and, at 10 o'clock, a third hand for the second time zone. Completing the picture are an aperture for world cities, a large date, a double-sided flying tourbillon and a power-reserve indicator. There is more to enjoy on the back, where reverse-fitted hour and minute hands sweep over the second face of the flying tourbillon, against a backdrop of meticulously decorated wheels and bridges.
